### **DETAILED ACTION**

## **Priority**

1. Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

## Allowable Subject Matter

- 2. Claims 1-9 are allowed.
- 3. The following is an examiner's statement of reasons for allowance:

The prior art does not disclose, suggest, or render obvious the combination of control electrodes to which an adjustable voltage is applied, a counter electrode having a fixed voltage and being provided between the body of fluid and one of the control electrodes, covering a part of the surface of the respective control electrodes, in particular the ratio of the width of the counter electrode to the width of the control electrodes being in the range from 10<sup>-5</sup> to 0.9. This invention solves the problem of providing a system for manipulation of a fluid droplet in which the control over and reliability of the manipulation of the fluid droplet is improved.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

# Conclusion

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Art Unit: 2853

The prior art of Tamura et al. (US 4,794,463) at least teaches an inkjet system (Fig. 1) having control electrodes to which an adjustable voltage is applied, but does not disclose a counter electrode having a fixed voltage and being provided between the body of fluid and one of the control electrodes, covering a part of the surface of the respective control electrodes, in particular the ratio of the width of the counter electrode to the width of the control electrodes being in the range from 10<sup>-5</sup> to 0.9.
